01 WELCOME

Type a line, and the machine calls it out in time. ALLANROP (Swedish for "general call", the old radio call to all stations) is a voice machine with its own speech engine and vocoder, built from scratch.

Robot, vocoder, talkbox, autotune, choir, megaphone, whisper, monster and chip voices, with over 260 ready sounds. It speaks Swedish and English. Or run your own voice or any track through it. The speech engine is built without AI and sounds machine-like on purpose: a robot, not a person.

SWEDISH LABELS

`Sändningar`	Broadcasts (the sounds)	`Text / Rytm / Steg`	Text / Rhythm / Step
`Röst / Ingång / Väg`	Voice / Input / Path	`Källa / Andning`	Source / Breath
`Tonhöjd / Skala / Kör`	Pitch / Scale / Choir	`Grundton / Glid`	Root note / Glide
`Lur / Kross / Korn`	Horn / Crush / Grain	`Eko / Rum / Plåt`	Echo / Room / Sheet metal
`Frys / Ångra`	Freeze / Undo	`Tydlighet`	Clarity

THE WINDOW

02 INSTALL

Unzip the file for your system. You get a folder called **ALLANROP**. Then run the installer for your system and restart your DAW (or rescan plug-ins). ALLANROP shows up as an instrument.

MACOS

1. Double-click `ALLANROP-macOS.zip` in Downloads.
2. Open Terminal and run:
   `bash ~/Downloads/ALLANROP/installera.command`
3. Quit your DAW completely and start it again.

VST3, AU and a standalone app. macOS 11 or newer, Intel or Apple Silicon. The installer copies the plug-ins and removes macOS's block on downloaded plug-ins.

WINDOWS

1. Right-click `ALLANROP-Windows.zip` and choose **Extract all**.
2. Open the `ALLANROP` folder and right-click `installera.bat` → **Run as administrator**.
3. If Windows says "Windows protected your PC": **More info** → **Run anyway**.

VST3 (in C:\Program Files\Common Files\VST3) and a standalone .exe. 64-bit Windows 10 or 11.

LINUX

1. Unzip `ALLANROP-Linux.zip`.
2. Run `bash ~/Downloads/ALLANROP/installera-linux.sh`. It copies the plug-ins to `~/.vst3` and `~/.lv2`.
3. Rescan plug-ins in your DAW (Bitwig, Reaper, Ardour and others).

VST3 and LV2, 64-bit x86 Linux (built on Ubuntu 22.04).

> SWEDISH OR ENGLISH
>
> The machines have Swedish names on the panel. One click on `SV | EN` in the header switches labels, menus and tooltips to English. Your choice is remembered for every MASKINHALLEN machine.

---

03 UNLOCK WITH YOUR KEY

Your purchase comes with a licence key: four groups of four characters, like `XXXX-XXXX-XXXX-XXXX`. You find it in the Payhip email and on your receipt.

1. Open ALLANROP. Until it is unlocked, the window shows **UNLOCK ALLANROP**.
2. Paste the whole key in the field and press `UNLOCK`.
3. Done. You only need to do this once per computer: every MASKINHALLEN machine on the computer finds the key. A bundle key unlocks every machine.

The key is not case sensitive, and I/L and O/0 are treated as the same character, so a typo there does not matter. If it says the key does not work, check that the whole key was pasted. You can use your key on your own computers.

THE FREE DEMO

Every machine has a free demo with the same sound engine. Some presets and functions are locked, and the demo has its own name (ALLANROP DEMO), so it can sit next to the full version. Buying the full version is what unlocks everything; install it and paste your key.

UPDATES

Updates are free for life. Download the new zip from your Payhip receipt link and run the installer again. Your projects and your key are kept.

---

04 YOUR FIRST 30 SECONDS

1. Put ALLANROP on an instrument track.

2. Press play in your DAW. The machine calls out the text in time.
3. Type your own words in the text box. Press Enter or wait a second.
4. Hold a key on your keyboard: the voice sings on that note.
5. Browse the sounds on the left, or roll the dice.

Rest the mouse on a knob or selector to see what it does.

05 THE SOUNDS

Click a group, then a sound. The sounds also show up in your DAW's preset list. Every sound has its own text, and all are level matched.

GROUP	STYLE
ROBOT	Straight, cold machine voices
VOCODER	Classic vocoder, 80s to now
TALKBOX	Rubbery talkbox, funk and house
AUTOTUNE	Hard autotune and stepped notes
KÖR	Choirs, chords and cathedrals
MEGAFON	Megaphone, phone, radio and tin pipe
SPÖKE	Whispers, breath and ghosts
MONSTER	Monsters, giants and chipmunks
CHIP	Old computer voices and 8-bit
RAVE	Rave shouts, stutters and vocoder stabs
ACID	Acid, wah mouths and resonance
FRYS	Long words, grains and surfaces
ELEKTRO · KORTVÅG · MAGI	Dark electro with deep vocoder voices, shortwave radio, and the MAGI effects

06 TEXT AND RHYTHM

Write anything. Spelling does not matter, the machine reads it as it sounds. Numbers become words: 909 becomes "nine zero nine".

SIGN	DOES
`-`	Pause (one silent step)
`*` after a word	Stutter: MA-MA-MACHINE
`~` after a word	Stretch the word (more ~ = longer)
`!` after a word	Hard, stressed
`?` after a word	Question: the pitch rises
CAPITALS	Stressed (if the rest is lower case)

- `ORD-TÄRNING` (word dice) invents a new techno phrase. `FRYS` holds the next vowel as a pad.
- The rhythm row under the text shows the syllables; the one being spoken lights up.

PLAY MODES AND RHYTHM

- `SPELA`: **Takt** follows the DAW (with the transport stopped, hold a key instead), **Fras** starts the text from the beginning on every key, **Tangent** says the next syllable on every key and holds the vowel, so you play the text like an instrument.
- `RYTM`: straight, euclid (hits of steps), stutter, reverse, random (shuffles the words) and question/answer.
- `STEG` 1/8, 1/16, triplets or 1/32. `TAKTER`: how often the text restarts. Plus `SVÄNG`, `LÄNGD`, `STAMNING` and `TALTEMPO`.
- `SPRÅK`: Swedish or English. Swedish works best; English is read with simple rules.

07 VOICE AND PITCH

VOICE

- `INGÅNG` (input): **Text** (the speech engine) or **Mik / spår** (mic / track). With mic/track, audio comes in through the vocoder: choose the source as the plugin's sidechain in your DAW. The pitch is tracked and pulled to the scale; held keys are played by the vocoder instead.
- `VÄG` (path): **Direkt**, the voice is shaped by a mouth (robot, talkbox), or **Vocoder**, the voice drives a synth through the bands.
- `KÄLLA` (source): buzz, square, supersaw, noise and pulse.
- `FORMANT`: the mouth size. Down = monster, up = chipmunk. `MUN-LFO` and `MUN-TAKT` open and close the mouth in time.
- `ANDNING`, `LJUS`, `SKÄRPA`, and `TYDLIGHET` (clarity: consonants come before the beat so the vowel lands on it).

PITCH

- `MELODI`: straight, talk melody, arp up, arp down, bounce and random.

- `SKALA`: minor, major, Phrygian, Dorian, pentatonic, harmonic, chromatic.
- `KÖR` (choir): octave, fifth, minor, major, sus4, minor 7, cluster, octaves, or **Tangenter** (the chord you hold).
- `GRUNDTON`, `OKTAV`, `AUTOTUNE` (0 natural glide, 100 razor-sharp steps), `GLID`, `VIBRATO`, `KÖR-NIVÅ` and `SVÄV` (voices spread in stereo).

08 VOCODER AND EFFECTS

VOCODER

Used when the path is Vocoder or the input is mic/track. `BAND` 6 to 40 (few = rough 80s, many = clear words), `REAKTION`, `SIBILANS` (s, t and k pass through so the words are heard), `BAND-RYTM` and `BAND-TRÄFF` (bands switch on and off in time).

EFFECTS

- `LUR`: megaphone, phone, radio or tin pipe, with amount.
- `RING` and ring tone: metallic robot voice. `KROSS` (bit crush), `KORN` (grains), `DRIV`, `BREDD` (width).
- `EKO` in time with time and feedback (it never runs away), `RUM`, `STORLEK`, `SHIMMER` and `PLÅT` (rattling sheet-metal walls).
- The level meter turns yellow when the safety valve works. ALLANROP can never blast your ears.

09 MAGI

The MAGI tab in the effects panel.

`SÄNDAREN`	The transmitter: the voice on shortwave. Five stations on the dial where the voice comes through clean; between them the pitch slides, it whistles and the noise takes over. DRIFT adds fading, ghost stations and morse in time.
`KLIPPAREN`	The cutter: records what the voice just said and chops it into a hook in 16ths: chop, bounce, reverse, staircase, random or euclid.
`KATEDRALEN`	The cathedral: sixteen voices say the same thing, a little late and a little different, in a concrete room. SVÄRM turns the swarm into a chord.
`SVAR`	The echo that answers: a second voice answers after the echo time with the next word, the same word reversed, a question, a random word or a whisper.

10 DICE AND UNDO

- **The big dice** blends two sounds from the same group into a new one, sometimes with new text.
- **The dice at each panel heading** (TEXT, VOICE, PITCH, VOCODER, EFFECT) randomises only that panel.
- `ÅNGRA` undoes the last roll, sound change or text, up to 30 steps.

11 TROUBLESHOOTING

ALLANROP does not show up	Quit the DAW completely and start it again, or rescan plug-ins. On Mac, run the installer again: it removes macOS's quarantine on the plug-in. On Windows, check that `ALLANROP.vst3` is in C:\Program Files\Common Files\VST3.
macOS says the plug-in is damaged	That is macOS's block on downloaded files. Run `bash ~/Downloads/ALLANROP/installera.command` again.
Windows protected your PC	Click **More info** → **Run anyway**. The plug-ins are not signed with a paid certificate.
The key does not work	Paste the whole key, including the dashes. A key for one machine only unlocks that machine; a bundle key unlocks all.
No sound	Press play in the DAW: the machines follow the transport. Instruments go on an instrument track, effects on an audio track or bus.

Anything else? Ask through the store, and the person who built the machine answers.
