MASKINHALLEN · USER MANUAL · VERSION 2.1

VENTIL

SWING · BREATH · DUB THROWS · FILTER

Swings anything with 90s/00s groove, adds living drift and throws dub echo only where it belongs.

VST3 · AU · LV2 · STANDALONE
MACOS · WINDOWS · LINUX

13 Troubleshooting

01 YOUR FIRST MINUTE

1. Put it on a drum bus, a loop, SPÅN or a whole track and press play. It follows the transport and tempo.
2. Turn the big **VENTIL** wheel and pick a groove DNA at the top.

SWEDISH LABELS

`Sväng / Mängd`	Swing / Amount	`Stöka`	Mess up (ghost notes)
`Känslighet`	Sensitivity	`Andning`	Breathing
`Band / Tonhöjd / Tid`	Tape / Pitch / Time	`Fras`	Phrase
`Kast / Eko / Mörker`	Throw / Feedback / Darkness	`Kasta nu`	Throw now
`Rum / Storlek / Ackord`	Room / Size / Chord	`Tonart`	Key
`Avfrost / Isbildning`	Defrost (freeze) / Icing	`Slinga / Kanal`	Loop-back / Channel

THE WINDOW

02 INSTALL

Unzip the file for your system. You get a folder called **VENTIL**. Then run the installer for your system and restart your DAW (or rescan plug-ins). VENTIL shows up as an audio effect.

MACOS

1. Double-click `VENTIL-macOS.zip` in Downloads.
2. Open Terminal and run:
   `bash ~/Downloads/VENTIL/installera.command`
3. Quit your DAW completely and start it again.

VST3, AU and a standalone app. macOS 11 or newer, Intel or Apple Silicon. The installer copies the plug-ins and removes macOS's block on downloaded plug-ins.

WINDOWS

1. Right-click `VENTIL-Windows.zip` and choose **Extract all**.
2. Open the `VENTIL` folder and right-click `installera.bat` → **Run as administrator**.
3. If Windows says "Windows protected your PC": **More info** → **Run anyway**.

VST3 (in C:\Program Files\Common Files\VST3) and a standalone .exe. 64-bit Windows 10 or 11.

LINUX

1. Unzip `VENTIL-Linux.zip`.
2. Run `bash ~/Downloads/VENTIL/installera-linux.sh`. It copies the plug-ins to `~/.vst3` and `~/.lv2`.
3. Rescan plug-ins in your DAW (Bitwig, Reaper, Ardour and others).

VST3 and LV2, 64-bit x86 Linux (built on Ubuntu 22.04).

> SWEDISH OR ENGLISH
>
> The machines have Swedish names on the panel. One click on `SV | EN` in the header switches labels, menus and tooltips to English. Your choice is remembered for every MASKINHALLEN machine.

---

03 UNLOCK WITH YOUR KEY

Your purchase comes with a licence key: four groups of four characters, like `XXXX-XXXX-XXXX-XXXX`. You find it in the Payhip email and on your receipt.

1. Open VENTIL. Until it is unlocked, the window shows **UNLOCK VENTIL**.
2. Paste the whole key in the field and press `UNLOCK`.
3. Done. You only need to do this once per computer: every MASKINHALLEN machine on the computer finds the key. A bundle key unlocks every machine.

The key is not case sensitive, and I/L and O/0 are treated as the same character, so a typo there does not matter. If it says the key does not work, check that the whole key was pasted. You can use your key on your own computers.

THE FREE DEMO

Every machine has a free demo with the same sound engine. Some presets and functions are locked, and the demo has its own name (VENTIL DEMO), so it can sit next to the full version. Buying the full version is what unlocks everything; install it and paste your key.

UPDATES

Updates are free for life. Download the new zip from your Payhip receipt link and run the installer again. Your projects and your key are kept.

04 THE BIG VALVE

One wheel controls every module at once along a fixed curve, so if you only want one thing to turn, this is it. Closed (0 %) passes the sound straight through. Half open brings in the swing and the breathing. Open adds dub throws, the room and the loop-back. Wide open adds automatic icing. The module knobs set how far each part goes when the valve is fully open; the MAKRO panel shows how much of each is active right now.

The ring around the wheel is one bar. Every detected hit appears as a dot: a faint circle where it was, a line to where VENTIL moved it, colour by type (KLICK, TICK, RÖST, TON, BRUS), white for kicks, a copper ring when it was thrown.

05 SVÄNG

VENTIL finds transients in real time (with 40 ms look-ahead, reported to your DAW) and moves each one towards the chosen groove DNA with short, inaudible crossfades, so nothing sounds time-stretched. Kicks are recognised by their low end and never moved.

- **SVÄNG**: how much of the DNA's micro-timing (up to 120 %).
- **MÄNGD**: how hard hits are pulled to their new place, and how much the DNA's accents shape their level.
- **STÖKA**: adds ghost copies of the last hat or click on empty sixteenths where the DNA wants them, and sometimes removes weak hits where it wants silence.
- **KÄNSLIGHET**: how easily something counts as a hit.
- **EGEN**: press EGEN... or drop a drum loop on the window to extract its swing (whole bars in your current tempo).

06 ANDNING

- **BAND**: tape wow and flutter.
- **TONHÖJD**: slow pitch drift, up to about ±15 cents.
- **TID**: hits drift up to ±4 ms within each bar and always return to the one.
- **FILTER** and **FRAS**: a gentle low/high-pass pair that breathes over 4, 8 or 16-bar phrases.

07 KAST AND RUM

KAST is a tempo-synced, tape-saturated dub delay with filtered feedback. Light up the boxes that may be thrown; VENTIL classifies every hit and throws only those, most often on the last beat of a 4, 8 or 16-bar phrase, like a human at a mixing desk. **KASTA NU** throws the next hit whatever it is. Delay times: dotted 1/8, 3/16, 1/4, 3/8 and 1/8.

RUM is a room built for dub techno: comb filters tuned to a chord in your key (MOLL, MOLL7, SUS, KVINT, OKTAV) feed a diffuse reverb, so the tail becomes a chord. Both returns duck for the kick.

08 AVFROST

Hold **AVFROST**: at the next grid line VENTIL freezes the last 1/16, 1/8 or 1/4 and loops it. The kick and sub keep going underneath. Release: the loop melts back with falling pitch over one beat. **ISBILDNING** makes short automatic freezes before phrases, like micro-edits. AVFROST is also a parameter, so you can automate it.

09 SLINGA, GULD AND THE FLOOR GUARANTEE

- **SLINGA** sends VENTIL's output to SPÅN on channel 1–4, where it is chopped into ghosts. Pick the same channel and VENTIL or BÅDA as the ghost source in SPÅN. **SPARA TILL SPÅN** saves the last two minutes as a fallback that SPÅN loads with HÄMTA VENTIL.
- **GULD** records VENTIL's output all the time. Drag across the waveform, then drag **DRA UT WAV** into your DAW (or click to save into Music/Phunkshunz/VENTIL GULD).
- **Floor guarantee**: everything below 120 Hz passes untouched and mono, throws and room duck for the kick, and a limiter keeps peaks below −0.3 dBFS.

10 FILTER

New in VENTIL 2. The filter works above 120 Hz, so kick and sub are never touched.

- **STRYP** (throttle) is a DJ filter on one big knob: left gets darker (lowpass), right gets thinner (highpass), the centre is off. Double-click to reset.
- **TYP**: VENTIL (smooth lowpass), DIOD (dirty diode ladder), HÖGPASS, BANDPASS, HAK (notch), KAM (comb tuned to the key you set at the top) and VOKAL (sweeps through a-e-i-o-u).

- **FREKVENS**, **RESONANS**, **DRIVE** and **MIX**. MIX 0 turns the filter off, exactly like VENTIL 1.
- **RÖRELSE** (motion): LFO (a wave in time), STEG (step patterns in time: TRAPPA, PUMP, ROTERA, EUKLID, KLIV, SPEGEL, PULS, SLUMP), FÖLJARE (opens with every hit) and ANDAS (slowly over the phrase). **DJUP** sets how far it moves; minus moves the other way. **TAKT** sets the speed from 1/16 to 4 bars.
- The curve shows the filter shape and where the cutoff is right now.
- **Safety:** the cutoff glides and never jumps, high resonance is tamed automatically, and a guard keeps the filter from getting more than 2 dB louder than what goes in.

11 PRESETS AND TROUBLESHOOTING

60 presets in seven groups: SNETT, DUB, MIKROHUS, MINIMAL 2005, TRUMBUSS, HELA LÅTEN (whole-track glue) and FILTER. Presets never change your output level, mix or loop-back settings.

- **Nothing moves:** the transport must be playing for the swing to work, and the valve must be open.
- **Too many or too few hits found:** adjust KÄNSLIGHET.
- **SPÅN does not get the sound:** both must be on the same channel and SLINGA above zero. Otherwise use SPARA TILL SPÅN and HÄMTA VENTIL.

12 NEW IN 2.1: LEVANDE (ALIVE)

VENTIL can now move by itself, inside limits you set, and throw short events in time.

`LIV`	Life: the knobs (swing, mess, tape, pitch, time, filter, throw, room) wander on their own within limits. A new position every bar, in an 8-bar loop that changes every 32 bars, so it moves but still repeats like a groove.
`UTBROTT`	Outbursts: short events in time, mostly between the beats: KASTSKUR (a shower of throws), FILTERSVEP (filter sweep), RUMSVALL (a swell of room) and TONSVAJ (pitch wobble). They land on the same place in the loop every time round.

The window is now 900 × 642. FILTER, MATNING (FEED) and GULD sit in tabs. Eight new presets in the group LEVANDE. With LIV and UTBROTT at zero VENTIL sounds exactly like 2.0.

MATNING: FEED IT A FOLDER

Load a whole folder of loops and sounds. VENTIL plays them in time and mixes between them like a DJ: the treble crossfades, the bass swaps cleanly in the middle of the transition, and the next sound is picked among those that sound like what is playing. `BYTE` (change every 16/32/64 bars), `ÖVERGÅNG` (transition of 4/8/16 bars), `VARIATION` and `NÄSTA` (next).

13 TROUBLESHOOTING

VENTIL does not show up	Quit the DAW completely and start it again, or rescan plug-ins. On Mac, run the installer again: it removes macOS's quarantine on the plug-in. On Windows, check that `VENTIL.vst3` is in C:\Program Files\Common Files\VST3.
macOS says the plug-in is damaged	That is macOS's block on downloaded files. Run `bash ~/Downloads/VENTIL/installera.command` again.
Windows protected your PC	Click **More info** → **Run anyway**. The plug-ins are not signed with a paid certificate.
The key does not work	Paste the whole key, including the dashes. A key for one machine only unlocks that machine; a bundle key unlocks all.
No sound	Press play in the DAW: the machines follow the transport. Instruments go on an instrument track, effects on an audio track or bus.

Anything else? Ask through the store, and the person who built the machine answers.
